## PHP DEVELOPER

Serbia, RS | 0621878911 | [vdejan93@gmail.com](mailto:vdejan93@gmail.com)

[www.dejan.page](http://www.dejan.page) | [in linkedin.com/in/dejan-vukelic/](https://www.linkedin.com/in/dejan-vukelic/)

## Work experience

PHP DEVELOPER 2017 - 2020

### MEDIAWORKS

PHP Developer at MediaWorks, working on a platform used for mobile apps from many companies as Radio Television of Serbia, Insajder, TopSpeed, Telenor, Politika, HanzaMedia, Seha League, O kanal, Oslobođenje, Vijesti.me, Laguna, Slovenian PrvaLiga, CorkCityFC and many more.

My job is to develop and improve platform service and improve API used for Android and iOS mobile applications as well as development websites and design content used in mobile applications and web.

One of the goals was also the acceleration of applications and the system itself, where I managed to accelerate the system by 90%, RTS app by 98%.

Technologies and services I use in development: HTML, CSS, JS, Bootstrap, jQuery, PHP, MySQL, Nginx, Apache, Redis, Ubuntu server, Git, CloudFlare, DigitalOcean, S3 and more...

Example of one of my many project that I make:

Insajder Android and iOS App. [Google Play](#), [App Store](#)

Slovenian PrvaLiga Android and iOS App. [Google Play](#), [AppStore](#)

Betsafe-LKL (live score, upcoming matches, live score push notification via firebase and more). [Google Play](#), [AppStore](#)

Radio Television of Serbia. [Google Play](#), [AppStore](#)

Vijesti.me [Google Play](#), [AppStore](#)

Practice - 2016

### MaxCDN

Introduction to nginx, MaxCDN configuration and caching techniques for period of 1 week

Teaching Assistant 2014 - 2015

School of Electrical and Computer Engineering of Applied Studies, Belgrade

Teaching Assistant @

- Computer Networks

- Protocols in Computer Networks

Students practice - 2015

\*nbgteam, Belgrade

Student practice for a period of 1 month as frontend web designer.

## Skills

Laravel

PHP

MySQL

HTML5

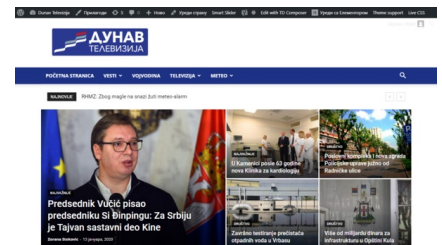

CSS3

JavaScript

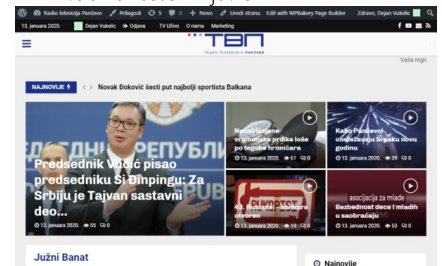

## Portfolio

### Dunav Televizija

### Project Finn CMS

---

I am currently working on a new CMS in Laravel that will provide greater flexibility to clients, easily insert news or import from existing wordpress and similar sites, as well as selecting and editing designs. Users have the ability to change menus through CMS, add new things, send push notifications, add YouTube playlists, and social media posts.

Demos can be viewed [here](#)

Insajder App

Betsafe-LKL Android App

## McDonald's quiz

This project is created for McDonald's as CMS for quiz where users can answer to questions and see result and earn some special coupons.

Another project, Summer chance, balloon game, play and win special summer coupons, advent calendar and more...

Summer chance game, view [demo here](#)

## Web reader (project Erso)

This project is designed for clients who publish printed newspapers, so that their clients who want to read newspapers in their web browser can easily do so without installing a mobile application. Clients can read on desktop and mobile devices, on mobile if user rotate to landscape mode can read two pages like newspaper, or single page on portrait mode.

This project is designed for clients such as Politika, Hanzamedia, PC Press and more ...

## RTV Pančevo

Radio Television Pancevo is a company registered for broadcasting television and radio programs. For this purpose, I created a new redesigned site focused on media content created with WordPress CMS.

Website: [www.rtvpancevo.rs](http://www.rtvpancevo.rs)

## Dunav Televizija

Dunav Television is a company which is registered to broadcast television programs. For this purpose, I created a new website focused on media content created with WordPress CMS.

Website: [www.dunavtelevizija.rs](http://www.dunavtelevizija.rs)

## Bloggly.com

This project was done in Laravel 5.3 framework with option for wildcard subdomain, domain mapping option, analytics with Google Analytics API and CloudFlare CDN with api for adding new subdomain to dns for SSL support. AdminLTE used for dashboard theme.

Username and password for bloggly.com

username: demo@demo.com

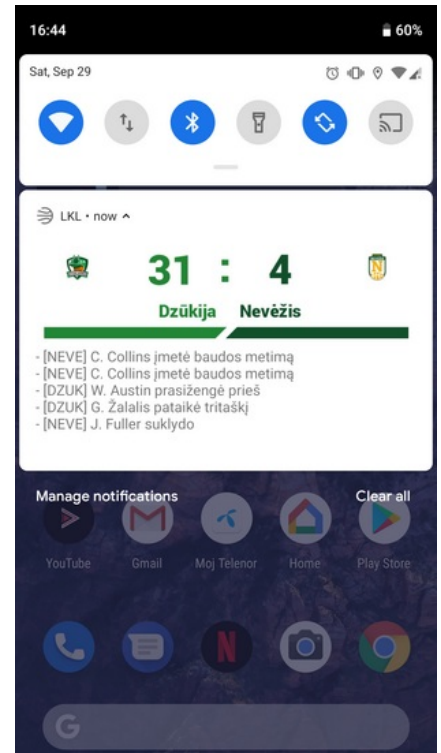

password: demo123

UPDATE: I am currently upgrading the project, preview is not currently available.

## Pehari.rs

This project is created with WordPress and woo commerce plugin used as catalog for products, pictures is compressed with lossless compression. Website design is provided from themeforest.net and customized. Website is hosted on DigitalOcean and use CloudFlare as CDN.

Website: [www.pehari.rs](http://www.pehari.rs)

### Live Score push notification

### McDonald's Balloons

Summer Chance Game

## Freeradio.top Android app

Freeradio.top is android application created for same website. Application is made using ionic 3 framework and data is provided and cached on website with custom api created for mobile application. App is available on [Google play store](#).

## Freeradio.top

Freeradio.top is online radio streaming app created with Laravel5.4 and data is provided from ShoutCast API, this data is cached on server and stream url is extracted from .pls files. For website design is used Pulse theme from themeforest.net. Website is hosted on DigitalOcean and use CloudFlare as CDN.

Website: [www.freeradio.top](http://www.freeradio.top)

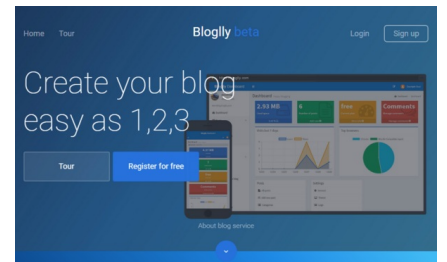

## Hanzamedia news reader

Reader for e-kiosk Hanzamedia, <http://online.jutarnji.hr/>
